

DOCUMENTATION – CARD GAME TEMPLATES

Total cards: 216

Each card has its own template in **Photoshop**.

- Although the information, names, descriptions and titles are in Spanish, you can edit them in Photoshop and add the text in the language you want.
- Each letter is divided into several sections so you can edit the background, title, margins and icons as you wish.
- You can use these already created cards or your own in your commercial and non-commercial projects.
- You don't have to give credits
- The cards are now converted to 2D GUI Sprite and you can add them to the Unity scene.
